

Brinell

Hardness Tester

- Enclosed load cell for applying major loads
- Selectable dwell time
- User-friendly operational panel
- Accurate and fast
- Rugged and reliable

No more cumbersome heavy weights to handle and no more messy oils!

The Brinell Hardness Tester from LECO uses a load cell for measuring test forces, providing a highly efficient yet low-cost means of Brinell hardness testing. Tough and durable with a neat appearance, it is perfect for laboratory or shop environments with low-to-medium testing requirements. Simple operation combined with high accuracy makes this the tester of choice.
